

Comments from Parents; why they enrolled their child in Fireweed Academy.

Because it is an exceptionally good school with dedicated staff and teachers that employs an educational approach consistent with our philosophy on childhood development of learning.

We are interested in an alternative learning approach. We think that it is unreasonable to expect children to learn by sitting still and silent. Learning should be an interactive process where children are encouraged to be responsible for their own learning. Gaining an understanding of social responsibility and developing critical thinking skills are crucial parts of the educational process.

Like the idea of how the teaching is done, think our daughter will like it.

To show my daughter that learning is real and purposeful. I would like her to be in an environment that will help her discover learning is exciting and a life long endeavor.

Great School!

It is a great school with incredible teachers!

My son says its fun.

This is the only school she has attended and she does well here. We like the school teaching hands on.

We love you guys!

We love Fireweed, teachers, projects and field trips, hands on-good structure and self-sufficiency.

We love the philosophy and fireweed program. I love the theme group based learning especially.

We think our daughter would be better served and more challenged by being in a charter school. She seems to have lots of idle time in her current school.

My partner and I have home schooled our daughter while traveling throughout the United States and India. We also used an immersion approach in which all components of education were integrated into the relevant themes of our surrounding environment. We think it is more important for children to gain an understanding of knowledge with an ability to apply that knowledge than an ability to deliver facts. Fireweed utilizes an educational approach that provides children the opportunities to grow and learn in a supportive, flexible environment that encourages curiosity and inquisitiveness. We think this will be a good fit for our daughter and look forward to being a part of the Fireweed Community.

Because this is our school!

Like the Fireweed philosophy and our daughter responds well to it.

Project based, emergent curriculum, more and more interesting fieldtrips, focus on whole child, not just academics.

Our son is looking forward to finally attending little Fireweed. After 3 years of dropping his big sister off and helping and visiting, he says he is ready!

She has thrived here in the past; I expect it will be the best fit for her next year.

We love you guys!

My kids love this school. My son is going to 7th grade ☺

My son is showing improvement in all areas and enjoys going to school there.

We appreciate the faculty and all the academic projects the students engage in.
